IRRIGATION EXPERT!

Col. R. J. Hinton Talks of Southwestern Enterprises.

THE ARID LAND POLICY AND THE LATE IRRIGATION CONVENTION.

FAVORS ALBUQUERQUE AS NO. 1 MEETING PLACE OF IRRIGATION CONGRESS.

NEW MEXICO'S OPPORTUNITY.

Col. Richard J. Hinton, as everybody knows is an irrigation enthusiast. He is especially enthusiastic concerning the prospects of New Mexico. After the convention at Los Angeles he made a trip through California, and yesterday he said to the Santa Fe New Mexican:

"The present price of land in California gives New Mexico disappointment. There is no reason to expect that the Californians will reduce their prices, and if the large holders of land in New Mexico offer small farms at low figures for the next three years they can stop the bulk of the large western migration in New Mexico."

At three o'clock precisely the house and senate adjourned sine die.

BIG FAILURE!

NEW ENGLAND WOOL AND COTTON FIRM GOES UNDER.

LEADVILLE CROWDED WITH UNEMPLOYED MEN.

MCKINLEY WILL GET A BIG MAJORITY NEXT TUESDAY.

ROLES OF THE POPULISTS.

Springfield, Mass., Nov. 3.—Blansfield, Junior & Co., of Chicopee, dealers in cotton and wool stock, have failed. They did business over the United States, Canada and Europe. Their annual sales were three million dollars. The cause of the failure was no market for goods. The firm hopes soon to resume. The firm was founded in 1859.

LEADVILLE A DEAD TOWN.

Philadelphia, Nov. 3.—At the request of the local assembly the executive board of the Knights of Labor has issued an appeal notice requesting miners and smelters, lumber and laboring people in all branches to stay away from Leadville, Colo. The notice says that more than one thousand men are looking for employment at that place with little hope of having anything to do in the winter. The home smelters are wholly shut down and the bulk of the ore is too low grade to be shipped at a profit since the last drop in the price of silver. As a natural consequence the times are hard, and worse is looked for during the long winter among the barren Rockies.

MCKINLEY'S MAJORITY.

Youngstown, Ohio, Nov. 3.—Judge King, a prominent republican leader, says: "I found myself the only representative of New Mexico, until I ran across Mr. H. P. Heintzelman, Silver City, to whom I transferred Mr. Harrison's proxy. He proved himself extremely useful."

The congress was a most remarkable body of men. Everybody in the way of an irrigator was there except the Multibell Sellers and the politicians. The talk of the session of the public lands subsided. That is dead. The sentiment of the convention was always for a comprehensive national policy, and to end the administration of New Mexico to statehood.

During his residence in Albuquerque, Judge Collier has served as city attorney under three administrations—Childers, Mandell and Eastday. Within two years past he has been associated with Mr. O. N. Marion, a promising young attorney, and the firm is enjoying a large practice.

Judge Collier has many warm friends in his native state, and they came actively to his support in his candidacy. Since his nomination he has received many congratulatory messages from them, as well as numerous flattering editorial references from the press of Georgia. His career as a lawyer has secured for him the endorsement of the supreme court of that state, as well as of the senators and other distinguished men. He will open court at the next session in March.

Silver mining has about ceased in northern Arizona. On the other hand the gold output has much augmented. The only silver properties of note now being worked are in the White hills. Prescott has fair to become a great gold mining center.
